Number of people _____ Number of dairy cattle _____
Number of other cattle _____
Number of hogs _____
Number of _____

Water for commercial or industrial use: Yes No

Provide details and include estimated number of users for commercial or industrial use.

If you have large water needs and want more than a single family sized water service connection, please explain:

APPLICATION REQUIREMENTS

- 1. Engineering Application form completed, signed and dated.
- 2. A \$200 non-refundable engineering fee is required with the completed application for consideration for a typical 1 Benefit Unit Water Service Connection. (1 BU equals 27,000 gallons of water per/month)
 - Engineering fee minimum is \$200, additional fees may apply based on charges from CKRWP Engineer.
- 3. Include an aerial photo marked with desired location for the meter pit installation.

The engineer and CKRWP advisory committee review applications and determine whether the application is approved or denied. If the rural water engineering application is approved, it is valid for six (6) months from date of committee approval. An approval letter will be sent, with appropriate paperwork and the required fees needed to initiate water service. An approved application does not guarantee water service. Paperwork and connection fees must be paid in full before installation of water service. After 6 months a new engineering application would have to be submitted, if installation has not occurred or fees have not been paid. Additional information on connection cost and CKRWP Rules and Regulations are available upon request.
